

FISHERMANS CHAIR

Model Number : PFC-24

DESIGNER NOTES

The Fisherman's Chair is the result of a community looking to replace a very basic "dock chair" design with something more functional and durable. This sturdy, low maintenance model simulates a traditional angler's or fisherman's chair found on piers or recreational and commercial fishing boats. The seat is high enough to sit comfortably and cast a line over railings or barriers on wharfs and quays. No need to actually get out the fishing gear – users will enjoy the comfort and visibility that the chair provides in addition to the novelty of the design. Great for photo ops! Can be made in at custom heights depending on the application.
