Re: Wishbone\Timeless Skate Ramps

Six Years ago the members of The Port Hardy Skate Club had a dream of building a Skate Park for youth and families of the North Island. These skateboarders worked very hard and succeeded in obtaining the support of Town council, Rotary, The Lions Club and The Vancouver Foundation.

This club investigated many parks on Vancouver Island and collected a great deal of information. They designed their own park and needed a company to build their dream park.

Ron, Ryan and Joey of Wishbone\Timeless Skate Ramps traveled to Port Hardy to meet with the skateboarders and assured them that they would build the ramps to their specification. They came through for us and the ramps are first class.

I asked a number of the skateboarders if they liked the ramps better than concrete or steel and they all said “ The ramps are better because this material wasn’t as slippery and it had much better grip”

I would recommend this company to any community wanting to build a skate park. For more information you may contact me @250-949-7002.

Sincerely,

Jackie Ralph
