

BESELT LARGE CAPACITY ROUND WASTE RECEPTACLE

Model Number : BTRR-40RT With Rain Top Cover (Shown)

BTRR-40 With-out Rain Top Cover

DESIGNER NOTES

The Large Capacity Beselt Round Waste Receptacle is the handsome big brother to our Beselt Round Waste Receptacle. Though our customers really like the Beselt Round, in some applications the big brother version would be better suited. In true Wishbone fashion we are happy to accommodate. This larger receptacle is a reworking and stretching of the original keeping parks and playgrounds neat and tidier longer, while still adding beauty and style. The following features have been added: For areas with higher volumes of waste we have increased the capacity from 24 gallons to 40 gallons. Added side access to the bin makes it easier for the simple removal of heavy waste as well allowing for easy maintenance. The optional rain top cover brings a modern touch while providing three added benefits. For those locations that receive a lot of rain, rainwater is deflected so that the receptacle does not fill with water. Clever birds such as magpies, seagulls and crows will find it challenging to get into the garbage allowing for a cleaner site. And finally, the height between the hole and lid makes it difficult for people to put in larger items that should be saved for large bins. By design, the top can easily be replaced in case of vandalism or damage.

Like its baby brother, over 50 percent of the receptacle is made from recycled aluminum which is primarily sourced from car and truck rims. Taking care of it is simple and easy with premium low maintenance construction materials so there is no corrosion or rust ensuring years of use while maintaining its handsome look. The Large Capacity Beselt Waste receptacle adds a modern yet classic look to any park.
