## Parker Fisherman's Chair

site furnishings

Catch the Big One from The Fisherman's Chair! A community was looking to replace a very basic "dock chair" design with something more functional and durable and we came up with this this sturdy, low maintenance model that simulates a traditional angler's or fisherman's chair found on piers or recreational and commercial fishing boats. The seat is high enough to sit comfortably and cast a line over railings or barriers on wharfs and guays. No need to actually get out the fishing gear; users will enjoy the comfort and visibility that the chair provides in addition to the novelty of the design. Great for photo ops when you reel 'em in! Custom heights can be created depending on the application.
