

# John Jumbo Outhouse Building

Model Number

PTR-6J (Jumbo)

The John Jumbo Outhouse was designed at the request of some parks departments looking for an alternative to traditional wood buildings. The "Jumbo" Version, as the name implies, is a larger version of the regular version. In Canada it meets the basic requirements for wheelchair accessibility; though it does not meet ADA requirements in the US. See our Wheelchair Accessible version. The John addresses many of the issues typically associated with outdoor latrine buildings in semi-remote locations-transportation and handling, assembly, and the use of materials that require minimal if no maintenance over several years in a wide range of diverse environments. The John meets and exceeds these expectations while providing a very comfortable and memorable user experience. Strategically designed as a modular system, the individual components can be easily carried into semi-remote locations and be put together with minimal tools at a fraction of the traditional wood and concrete alternatives. The building is made from sturdy lightweight powder coated aluminum components, making it resistant to corrosion. The tongue-in-groove recycled plastic lumber slats will not rot or absorb moisture and can be sprayed with bleach or disinfectant without damage. After cleaning, excess water simply drains out the sides from the raised walls. They fit seamlessly into channels with only a few hidden fasteners, also making the unit theft and tamper proof. Lack of lighting normally associated with these types of structures has also been addressed with a translucent one-piece roof. It provides plenty of light but it does not compromise its strength and acts as an effective barrier against sun, wind and rain. The one-piece roof structure caps the entire unit providing ample protection from the elements and locks the whole structure together making it extremely solid. With most of the products we develop, the naming of it usually has a meaning. The name John, although seemingly quite applicable for the application, is actually named after the CEO and President of Wishbone. It is the only product, of the dozens that we have, where his name actually worked.

## Material Specifications

Marine Grade Aluminum Frame  
Stainless Steel Hardware  
Super Durable Powder Coating  
100% Recycled Plastic Slats  
Western Red Cedar  
Accoya Modified Pine  
Hardened Bamboo

## Recycled Content

Recycled Content by Weight: 65%  
100% Recyclable

## Customized Solutions

Custom Powder Coating (Setup Charges May Apply)  
Toilet, urinal, toilet paper dispenser, sanitizer dispenser and vent stack are not included.  
All Aluminum Floor. (ALF-J)  
Waterless Toilet System by Toilet Tech.  
INST- 3.75 Stainless Steel Concrete Wedge Anchor Bolt  
Down Kit

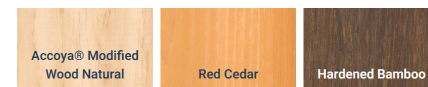

## Product Dimensions

Height: 96 inches / 244 cm  
Depth: 68 inches / 173 cm  
Width: 68 inches / 173 cm  
Weight: 1500 lbs / 680.5 kg

## 100% Recycled Plastic Lumber Colours

## Unstained Natural Wood Alternatives

OVER 30 POWDER COATING COLOURS \*Premium powder colours incur a surcharge per item
