

Urban Form Slim Line Waste Receptacle

Model Number

UFSLTR-21 (With Siding)
UFSLTRAL-21 (All Aluminum)

The attractive and unobtrusive and Urban Form Slim Line waste receptacle is the smaller brother of the standard and large capacity Urban Form receptacles. Its relatively tiny footprint takes up significantly less space along crowded streetscapes than typical square, rectangular, or circular units. Like the rest of the Urban Form Series, the horizontal lumber orientation and minimalist look match well with modern architectural elements. A keyless hidden door latch on the front door and removable liner makes servicing quick and simple for maintenance workers. The open-bottom design allows the ground under and around the unit to be easy cleaned or powerwashed. Minimal fasteners and a unique lumber-in-channel design makes replacement of boards very manageable. The 8" opening and solid top helps deter locals from emptying their household waste and also keeps out water and critters. Available with or without a foot operated pedal.

Material Specifications

- Marine Grade Aluminum Frame
- Stainless Steel Hardware
- Super Durable Powder Coating
- 100% Recycled Plastic Slats
